

## RADICALLY REDUCE THE SIZE OF YOUR MICROSOFT® OFFICE FILES

**OUTSTANDING COMPRESSION OF IMAGE-HEAVY FILES**  
FAR MORE EFFECTIVE THAN ZIP COMPRESSION, WITH NO UNZIPPING REQUIRED

**FILES REMAIN IN THEIR ORIGINAL FORMAT**  
THEY CAN BE OPENED AND EDITED BY ANYBODY WITH MICROSOFT® OFFICE

**PROVEN RETURN ON INVESTMENT**  
SIGNIFICANT SAVINGS ON STORAGE, EMAIL, BANDWIDTH, BACKUP AND PRODUCTIVITY

**Good content takes up space. Even in small companies, large Microsoft® Office files can cause significant storage, backup and transfer problems. In larger organizations these problems quickly scale up to become major issues.**

NXPowerLite™ radically reduces the size of Word, Excel® and PowerPoint® files in seconds, with no discernible loss of quality - making them easier to use, store and share. It does this by removing any excess baggage and converting embedded graphics to the most appropriate file format and resolution.

Traditional compression methods, such as zipping, have little effect on image-heavy files - which is where NXPowerLite really excels. And with NXPowerLite, there's no need to unzip your files before using them.

Files remain in their original format and retain all their functionality, so they can be opened and edited by anybody with a copy of Microsoft® Office. File recipients do not need to have NXPowerLite on their machines.

### DESKTOP EDITION

**Improve employee productivity, cut mobile data costs and enable the delivery of large email attachments**

- Fast, effective and incredibly easy to use
- Integrates seamlessly with Microsoft® Office
- Automatically optimizes Outlook® email attachments
- Fully customizable compression settings

**Requirements:** Compatible with PCs running Microsoft® Windows® 2000 or later. Microsoft® Office integration requires Office 2000 or later.

### SERVER EDITION

**Reclaim vast amounts of server storage, reduce network traffic and shorten backup windows**

- Automatically optimizes the Office files on your server
- Quick and simple to deploy
- Easily configurable to fit your environment
- No end-user training or involvement required

**Requirements:** Compatible with servers running Microsoft® Windows® 2000 or later.

The Desktop and Server Editions of NXPowerLite can be combined to create a powerful, tailored solution that maximizes your return on investment.

NXPowerLite is also available as a fully scriptable Development Kit (SDK) that offers maximum flexibility when integrating with existing systems.

### DEPLOYMENT

**NXPowerLite was designed to be simple to deploy, so you can start benefiting from the software right away.**

The Desktop Edition is delivered as a Windows® Installer MSI file. This makes it easy to perform a silent installation and registration using a mechanism such as Group Policy. The Server Edition can also be easily deployed and comes complete with a fully editable script.

## RETURN ON INVESTMENT

**NXPowerLite offers a significant return on investment in the following areas:**

- **Storage:** Instantly reclaim large amounts of existing server storage and save money on hardware upgrades.
- **Email:** Minimize instances of congested inboxes and undelivered attachments.
- **Bandwidth:** Reduce network traffic and data transfer costs for mobile workers.
- **Backup:** Lower backup media requirements and shorten backup windows.
- **Productivity:** Save employees time, effort and frustration, whilst reducing the strain on helpdesk support staff.
- **Postage:** Remove the need to physically mail or courier files that would previously have been too large to email.

## TESTIMONIALS

## REVIEWS

*"If you work with a lot of large files, you will want to get a copy of NXPowerLite."*

**ComputerLink**

*"Makes it easy for users of Microsoft® Office to squeeze some of the fat out of their rich documents. We were impressed by the product's ability to reduce the sizes of image- and object-laden files while maintaining the quality of these documents. We detected zero differences in quality between compressed and uncompressed files."*

**eWeek**

*"Doesn't exactly compress files, it wrings them out, shaking unneeded bytes out of graphics and included objects to radically reduce their size without affecting their appearance."*

**Information Week**

*"Quickly shrinks the size of bloated presentations."*

**Laptop**
